

## Anexo C da Avaliação da Declaração de Paris: Guiões de entrevistas

### Interview Guide – Joint Evaluation of the Paris Declaration, Phase 2

#### Introduction:

- PD . adopted 2005 with the aim of contributing to development results through improving aid effectiveness. Defined 5 principles for more effective aid. Ownership, Harmonization, Alignment, Management for Development Results and Mutual Accountability.
- These have had wide reaching implications for how aid is delivered.
- M&E . integral part of PD: *independent cross-country M&E processes to provide a more comprehensive understanding of how increased aid effectiveness contributes to meeting development objectives.*
- Baseline Monitoring survey . 2006. (indicators)
- Mid Term Monitoring Survey . 2008. (indicators)
- Phase I evaluation . 2008 (aid effectiveness results).
- Now . Phase II evaluation (focus on impact on development results).
- Main objective: *relevance and effectiveness of the PD and its contribution to aid effectiveness, and ultimately to development results, including poverty reduction.*
- Output will be a global synthesis report presented in Seoul at next HLF.
- Explain that the interview is designed to establish perceptions as well as facts, and so it's OK to be subjective, but that we would particularly like, throughout, the respondent to provide justifications or concrete examples to illustrate their points.
- Establish how much time the respondent has. Explain that you will choose the most relevant questions, so not to be put off by the seemingly large document.
